PROFESSIONAL SUMMARY

Full Stack Developer with over 25 years of experience in web development, covering the full project cycle: from requirements gathering to delivery and maintenance.

Solid experience with scalable systems, API integrations (REST, OAuth, ERPs), e-commerce, corporate systems and custom solutions. I work well both in teams and independently, always focused on delivery, quality, accessibility and compliance with the LGPD (Brazilian data protection law).

I added generative AI (Claude Code) to my workflow to speed up development, refactor legacy code and debug more efficiently — always with technical judgment and careful review.

SKILLS

Back-end: PHP (OOP), Laravel, Symfony, Zend Expressive, CodeIgniter, CakePHP, Node.js, Python
Front-end & UX: JavaScript, Vue.js, jQuery, HTML5, CSS3, Bootstrap, UX, Accessibility
Databases & Cache: MySQL, PostgreSQL, SQL Server (T-SQL), MongoDB, Redis
DevOps & Cloud: Docker, AWS, Linux, Nginx, Apache, Git, Scrum
Integrations: REST APIs, OAuth, Webhooks, Bling, SAP, Adobe, Payment gateways
AI in development: Claude Code — refactoring, debugging, testing, code review
Privacy: Development following LGPD (Brazilian data protection law) guidelines

PROFESSIONAL EXPERIENCE

Hands On
Jul/2019 – Present

Senior Developer Analyst

- Development and maintenance of the idplugger promotions & sweepstakes platform — a multi-tenant architecture (CakePHP, Laravel API, Redis and Python) serving everything from small businesses to major brands such as Bunge Alimentos, Óticas Carol and SERASA.
- Development of systems and API integrations (REST/OAuth) for clients such as Pearson (Wizard), Bunge and Anfarmag.

Vector
